Policy of Green Club & Environment Committee

Mission:

The policies of a Green Club and an Environment Committee typically focus on promoting sustainability, environmental stewardship, and eco-conscious practices within their respective organizations or communities.

Raising awareness about environmental issues through workshops, seminars, and guest speakers. Advocating for environmental policies and participating in community initiatives. Initiating projects to protect and restore local habitats and biodiversity. Green Club Committee involves establishing guidelines and procedures that align with environmental goals and promote sustainability. Here are some key policies that could be considered:

By implementing these policies, a Green Club or Environment Committee can effectively advocate for environmental sustainability, engage stakeholders, and contribute to positive change within their school or community. Increase awareness about environmental issues, such as climate change, pollution, resource depletion, and biodiversity loss, among students, faculty, staff, and the broader community.

Objectives:

1. To awaken the students about environment preservation and conservation.
2. To awaken the students about the disadvantages of environment pollution.
3. To aware the students about tree plantation and water conservation.
4. To create environmental and cleanliness awareness among students and staff using various techniques.
5. To educate students and staff for plantation of more number of trees including medicinal plants and maintaining the college campus green by using concept of Reduce, Reuse and Recycle.
